Application & Review Process

- Online application portal (opportunity.nebraska.gov/bia)
- Open application cycle starting on or before July 1st
- Cycle will continue until funds are exhausted
- Reviewed by internal committee every other week
- Project costs can only be incurred within contract period (post review)
- Payments are made via direct deposit
- Payment requests must be accompanied by documentation of expenses and proof of payment
- Reimbursements are a share of expenses
- Guidelines provide contract timelines for specific programs
- Retention and clawback information in program contracts
BIA Value-Added Agriculture Match

- BIA projects that meet the qualifications for value-added agriculture (VAA) only need to provide 20% of funds for project costs (DED can fund 80%)
- VAA projects should increase efficiency or profitability of farming or ranching operations in Nebraska
- Examples: ag equipment manufacturing, precision ag, animal health, industrial biotechnology, animal feed, food products that move raw materials up the value chain, etc.
- Application process is the same as regular BIA project. DED must verify VAA eligibility.
Grant Application Best Practices

• Understand your Audience
  – Acknowledge the goal of the program (ROI)
  – Explain jargon/acronyms

• Open Narrative
  – Be clear about what the project entails
  – Be honest about possible deficiencies

• Validate your Assumptions
  – If possible, get potential customer feedback
  – Build out a budget based on real bids

• Don’t Operate in a Vacuum
  – Build a team
  – Have another set of eyes review your business plan/application
  – Take advantage of professional resources (NBDC, InvestNE, etc.)
  – Listen to feedback
